Ugreen US129 USB cable USB 3.2 Gen 1 (3.1 Gen 1) 0.5 m USB A 5 Gbit/s Black:

The active extender from Ugreen allows you to transfer data at speeds up to 5Gb/s. It is made in USB 3.0 technology and has a USB-A (male) and USB-A (female) plug. It is backward compatible with USB 2.0/1.0 technology, so you can connect it to older devices equipped with the above. connectors. With it, you can quickly copy data from an external hard drive, camera or camcorder with a USB-A connector. You can also use it to connect a printer that is far away from your computer. The extension cable allows you to easily connect any device to a hard-to-reach USB port, which is located, for example, on the back of the computer case. It will also solve the problem of too short cable from the external hard drive. Very useful in everyday office work.
